### SUMMARY

**Data Analyst** with 3+ years converting funnel, pipeline, and behavioral data into revenue decisions across real estate, legal-tech, digital media, and nonprofit growth. Built ETL systems that cut manual reporting by 40%, ran A/B tests that lifted conversion by 15% and landed in the product roadmap, and delivered analytics on \$24M+ in project launches as the sole analyst for an entire sales team.

### EXPERIENCE

**Data Analyst - Growth & Marketing** | Delta Rising Foundation Mar 2026 - Present  
CA, United States | Remote

- Unified cross-channel acquisition reporting for the first time and engineered a GTM + GA4 framework across Google Search, Performance Max, and Meta, replacing 3 separate manual reports with a single real-time leadership dashboard
- Increased landing page conversion by diagnosing paid traffic drop-offs through full-funnel GA4 mapping from ad click to donation/volunteer signup and identified the leaking stage and changes were implemented within the same sprint
- Improved targeting precision across 3 active campaigns by cutting 8K+ monthly keyword candidates to 8–10 highest-intent terms per ad group and reduced irrelevant impression share and increased signal quality for Google Search and Performance Max

**Data Analyst - Sales Operation** | Echelon India Jan 2023 - Dec 2023  
Noida, India

- Increased lead-to-close conversion by 12% with Python stage-conversion analysis on 1,000+ leads isolated the exact funnel stages losing deals; findings adopted into the sales playbook and redistributed to all 12 reps within 2 weeks
- Saved 40% of weekly reporting time and replaced manual spreadsheet exports with automated ETL pipelines (deduplication + validation) feeding real-time Power BI dashboards (SQL + DAX) tracking pipeline velocity and revenue forecasts
- Grew marketing ROI by 15% and informed \$24M+ in project launches with cohort analysis ranked acquisition channels by customer LTV, reallocating budget toward top sources; SQL and Python CRM models drove executive pricing and go-to-market decisions across 50+ neighborhoods

**Data Analyst** | India Legal Jun 2021 - Dec 2022  
Noida, India

- Increased user conversion by 15% and designed, executed, and validated end-to-end A/B tests on onboarding flows and marketing campaigns; the only analytics initiative that cycle formally adopted into the product roadmap
- Accelerated product sprint planning by building SQL funnel models and Python behavioral segmentation that mapped bottlenecks across every acquisition channel as output was a ranked friction list consumed directly in sprint sessions
- Improved data accuracy by 30% and cut reporting effort by 20% with Tableau dashboards with embedded validation controls replaced error-prone manual pulls; LTV and cohort analysis redirected marketing budget toward highest-retention acquisition channels

### PROJECTS

**FIFA 2026 Predictive Power Modelling** | Python, Databricks, Statistical Modelling -

- Predicted group-stage and knockout outcomes for all 64 World Cup nations with composite scoring model with 3 engineered features (form index, head-to-head rating, squad depth score) ran Monte Carlo simulations on a bronze–silver–gold Databricks pipeline, visualized in Power BI

**NYC Data Warehouse — Taxi & Restaurant Investigation** | BigQuery · dbt · SQL · Dimensional Modeling

- Delivered a production-grade star-schema warehouse in BigQuery with a cross-dataset finding with dbt transformations and automated pipeline monitoring at scale; analysis revealed highest-complaint NYC neighborhoods had 2.3x higher critical health violation rates than low-complaint areas

### EDUCATION

**Baruch College, CUNY** | MS Business Analytics — Data Analytics Concentration Jan 2024 – Dec 2025  
New York, NY

**GGSIU** | BBA Business Administration — Economics Concentration Aug 2018 – Jul 2021  
Delhi, India

### SKILLS

**Languages & Tools:** Python, SQL, R, Pandas, NumPy, scikit-learn, XGBoost, Power BI, DAX, Tableau, BigQuery, Snowflake, Databricks, dbt, AWS, Airflow, GA4, GTM, Google Ads, Salesforce, Git

**Analytics:** A/B Testing, Funnel Analysis, Cohort Modeling, Regression, Classification, ETL/ELT, Dimensional Modeling, KPI Definition, Causal Inference, Revenue Modeling, Data Visualization
