

Dhruv Sharma

Data Analyst • Python • SQL • Power BI • Snowflake • Databricks • GA4

Jersey City, NJ | +1 2014231587 | dhruvsharma2299@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

EDUCATION

MS in Business Analytics, Conc: Data Analytics | Baruch College, CUNY | New York, NY Jan 2024 - Dec 2025

Bachelors in Business Administration, Conc: Economic | *GGSIU* | Delhi, India Aug 2018 - Jul 2021

SKILLS

Languages & Tools: Python (Pandas, NumPy, scikit-learn), SQL, R, Power BI (DAX), Tableau, BigQuery, Snowflake, Databricks, AWS, Airflow, DBT, GA4, GTM, Google Ads, Salesforce

Analytics: A/B Testing, Funnel Analysis, Cohort Modeling, Regression, Classification, ETL/ELT, EDA, KPI Definition, Causal Inference, Revenue Modeling

EXPERIENCE

Market Growth Analyst | Delta Rising Foundation · Remote, CA Mar 2026 – Present

- Built cross-channel analytics framework integrating Google Search, Performance Max, and Meta campaign data via GTM and GA4, enabling unified performance measurement across all acquisition channels
- Analyzed GA4 conversion funnel data from paid click through donation/volunteer signup, identifying user drop-off points that directly informed landing page optimization decisions
- Conducted keyword performance analysis across 8K+ monthly searches using Google Keyword Planner, filtering to 8–10 high-intent terms per ad group across 3 active campaigns to sharpen targeting precision

Sales Operations Data Analyst | Echelon India · Noida, India Jan 2023 – Dec 2023

- Owned end-to-end analytics for a \$24M real estate portfolio, using SQL and Python to analyze CRM pipeline data and inform pricing strategy, launch timing, and market segmentation decisions
- Conducted sales funnel and stage-conversion analysis in Python, identifying key drop-off points that improved lead-to-close conversion rate by 12% across 1,000+ leads
- Engineered automated ETL pipelines with deduplication and validation logic, cutting manual reporting effort by 40% and powering real-time Power BI dashboards tracking pipeline velocity and revenue forecasting
- Performed cohort analysis on acquisition channels to surface high-value customer segments, informing marketing spend allocation and guiding product launch sequencing

Data Analyst | India Legal · Noida, India Jul 2021 – Dec 2022

- Designed and executed A/B tests on onboarding flows and marketing campaigns, driving a 15% uplift in user conversion. Those findings adopted directly into product roadmap decisions
- Built SQL-based user funnel and behavioral segmentation models to identify conversion bottlenecks across multiple acquisition channels on a legal-tech platform
- Built Power BI and Tableau dashboards tracking CAC, funnel performance, and retention; conducted LTV and cohort analysis to identify high-value user segments for marketing budget prioritization

PROJECTS

FIFA 2026 Predictive Power Modelling | Python, Databricks, Statistical Modelling -

- Simulated 64-match tournament outcomes using Monte Carlo methods on historical FIFA match and player data, generating team win probability rankings across group-stage and knockout scenarios
- Engineered competitive performance features (form index, head-to-head rating, squad depth score) in Databricks to improve predictive signal quality over raw statistics

Spotify Recommendation Engine | R, RStudio, Cosine Similarity, Feature Engineering -

- Built a music recommendation system using cosine similarity on engineered audio features (tempo, energy, danceability, valence), producing personalized ranked song suggestions from listening history
- Constructed similarity matrices in R to cluster user preference behavior and validate recommendation accuracy against held-out listening data
