Jersey City, NJ | +1 2014231587 | dhruvsharma2299@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

EDUCATION

Master of Science in Business Analytics , Concentration: Data Analytics <i>The City University of New York, Baruch College</i> New York, NY	01/24 - 12/25
Bachelors in Business Administration , Concentration: Economic <i>GGSIPIU</i> Delhi, India	01/18 - 12/21

SKILLS

Tech Stack: Python (Pandas, NumPy, scikit-learn), SQL, R, Looker, Tableau, Power BI(DAX), Excel, BigQuery, AWS, Azure, Google Cloud, Airflow, Snowflake, DBT, Databricks, Lucid Chart, Alteryx, MS Visio, Google Analytics, Google Task Manager (GTM), Google Ads, Gmass, Salesforce, Canva, Jira, Notion, Slack, Github

Core Competencies: Regression, Classification, Feature Engineering, Model Validation, A/B Testing, Funnel Analysis, Causal Inference, Cohort Modelling, Pricing Optimization, Growth Analytics, Revenue Modelling, ETL/ELT, Exploratory Data Analysis (EDA), KPI Definition

EXPERIENCE

Market Growth Analyst Assistant | Delta Rising Foundation | Remote, CA, USA 03/26 - Present

- Managed Google Ads campaigns across 3 active programs (AIMRV, Resilience Nursery, Product Sales) by auditing keyword performance, restructuring ad groups, and implementing phrase/exact match strategies to improve targeting precision
- Built Meta Ads audience targeting strategy for a national US campaign by defining interest, behavioral, and demographic segments aligned to donor and volunteer acquisition goals
- Designed GA4 conversion funnel tracking full user journey from paid ad click to donation/volunteer signup, identifying drop-off points that informed landing page improvements
- Conducted keyword audits across 3 campaigns using Google Keyword Planner, filtering for 8K+ monthly search volume and medium-high competition terms, resulting in a refined keyword set of 8–10 high-intent terms per ad group
- Oversaw end-to-end digital marketing analytics for a nonprofit running simultaneous Google Search, Performance Max, and Meta campaigns — managing tracking integrity via Google Tag Manager and linking campaign performance to website analytics in GA4

Sales Ops Data Analyst | *Echelon India* | Noida, UP, India 01/23 - 12/23

- Owned end-to-end sales analytics for a \$24M real-estate portfolio, analyzing CRM pipeline and campaign performance to inform pricing strategy, launch timing, and market segmentation decisions.
- Conducted sales funnel and stage-conversion analysis using SQL and Python, identifying key drop-off points that improved lead conversion performance by 12%.
- Built Power BI dashboards with SQL + DAX to monitor pipeline health, territory performance, and marketing ROI across 1,000+ leads, enabling leadership to track weekly sales performance.
- Developed automated ETL workflows with validation and deduplication logic, improving reporting accuracy and reducing manual reporting effort by 40%.
- Partnered with sales and marketing leaders to redefine KPIs, shifting reporting from lead volume metrics to pipeline velocity, conversion rate, and revenue forecasting.
- Performed cohort analysis on acquisition channels, identifying high-performing customer segments that guided marketing spend allocation and launch strategies.

Data Analyst | *India Legal* | Noida, UP, India 07/21 - 12/22

- Led product and growth analytics for a legal-tech platform connecting users with lawyers, integrating behavioral data from CRM systems, application databases, and marketing tools.
- Built SQL-based user funnels and segmentation models to identify conversion bottlenecks across acquisition channels.
- Designed and executed A/B tests on onboarding flows and marketing campaigns, increasing user conversion by 15%.

- Created executive dashboards in Power BI and Tableau tracking CAC, funnel performance, and retention metrics used by leadership for growth planning.
- Conducted cohort and LTV analysis to identify high-value users, informing marketing budget allocation and feature prioritization.

Data Analyst Intern | *APN News.* | Noida ,UP, India

01/21 - 06/21

- Analyzed cross-channel audience engagement and traffic datasets using SQL and Excel to identify trends influencing editorial and digital campaign strategies.
- Built KPI dashboards monitoring CTR, impressions, and retention, reducing reporting turnaround time by 25% and enabling faster campaign optimization.
- Automated recurring analytics reports and implemented data validation checks to improve reporting reliability.

PROJECTS

FIFA 2026 Predictive Power Modelling | Python, Databricks, Statistical Modelling -

- Built a predictive analytics model to estimate FIFA World Cup team performance probabilities using historical match and player statistics.
- Implemented statistical modeling and simulation techniques to forecast match outcomes and identify team strength trends.
- Processed and analyzed large sports datasets in Databricks using Python, generating insights on competitive performance indicators.

Human Age Prediction | Machine Learning Pipeline | Python (Scikit-learn), Snowflake, Model Validation-

- Developed a machine learning regression model to estimate human age, improving prediction accuracy through feature engineering and model tuning.
- Built a data preprocessing pipeline using SQL and Snowflake to clean, transform, and structure large datasets for model training.
- Evaluated multiple regression algorithms using cross-validation and performance metrics to identify the most predictive features.

Spotify Recommendation Engine | R, RStudio, Cosine Similarity, Feature Engineering -

- Designed a music recommendation system using cosine similarity to suggest songs based on user listening patterns and audio features.
- Performed feature engineering on song attributes such as tempo, energy, and danceability to improve recommendation accuracy.
- Built similarity matrices and ranking logic in R to generate personalized recommendations and analyze user preference behavior.
